

CoreGuard Elite SRD (Draft)

This draft summarizes the CoreGuard project discussed so far.

Vision: Android security app with privacy monitoring, threat detection, app inspection, network monitoring, timeline, Firebase backend, subscriptions, Jetpack Compose, Kotlin, MVVM.

Architecture: Android app, Firebase Auth/Firestore, optional backend APIs, Room, WorkManager, Hilt, Material 3, Play Billing.

Major Modules: Threat Center, Network Monitor, App Inspector, Timeline, AI Insights, Settings, Onboarding, Subscription.

Note: This is a condensed draft rather than the several-hundred-page SRD we discussed. I can expand it section-by-section into a full production SRD.
